

## INGREDIENT STATEMENT

Rev. January 2016

Dear Valued Customer;

Thank you for your queries about ingredients of Jim's Organic Coffee. While Food Labeling standards do not apply to coffee (FDA does not consider it to be a food); the following are our Ingredient Statements:

- All 'Regular' (Unflavored) and 'Decaffeinated' (Unflavored) Coffee – 100% Arabica Coffee.
- All 'Flavored' Coffee – Arabica Coffee with Natural Flavors added. Our Natural Flavors are derived from plants and do not undergo a synthetic process. We do not manufacture our flavorings and the exact ingredients are proprietary to our flavoring supplier. They do use Glycerin and Natural Ethyl Alcohol as 'binders' to keep the flavoring on the bean.
- We use Arabica beans from all over the world; wherever there is great organic coffee. When you purchase a 'Single Origin' coffee (i.e Colombian, Ethiopian); it contains 100% coffee from that origin. You are encouraged to visit our website for even more details about each coffee as they change periodically.
- Due to confidentiality and seasonal changes, we do not list the origins that go into each of our blends. We do change the ingredients due to crop and/or market conditions.
- Each of our 'Single Origins' and 'Blends' are *100% Certified Organic* by Oregon Tilth and the USDA National Organic Program.
- Each of our 'Decaffeinated' and 'Flavored' coffees are *Certified Organic* by Oregon Tilth and the USDA National Organic Program.
- The reason decaffeinated and flavored coffee do not meet the 100% label is that; for flavors – the coffee falls under the 95/5 rule where 95% of product (coffee) is organic and less than 5% of product (flavoring) is Natural and 'Suitable for Organic' Natural – a higher grade. For decaf, Swiss Water uses a carbon filter to bind with the caffeine molecules and USDA has deemed that there is no such thing as organic carbon.
- We do not use Robusta Coffee; a lower grade of coffee.
- All of our Decaffeinated Coffees are decaffeinated using the Swiss Water Process. Please visit [SwissWater.com](http://SwissWater.com) for more details.
- All of our coffees are grown at high elevations (over 1300 meters). Many are even higher.
- We estimate that we use among the world's highest 1% of quality Arabica beans.
